

Vibraswitch Malfunction Detector Model 366

General Description

The Model 366 **VIBRASWITCH** is a vibration sensitive device that protects rotating and reciprocating machinery from extensive damage resulting from mechanical malfunction. When the vibration level of the **VIBRASWITCH** protected machine exceeds normal by a preselected amount, an internal switch closes, actuating either an audible warning system or a shutdown circuit before damage occurs. Failing bearings, broken blades and similar malfunctions cause increased imbalance or high frequency vibration detectable with the **VIBRASWITCH**. It is designed for maintenance-free service in permanent installations where general purpose weather-resistant enclosures are required.

The **VIBRASWITCH** is an acceleration sensitive instrument that measures the total acceleratory shock present on the machine. Acceleration is a vibration characteristic of prime importance in cases of mechanical failure on reciprocating or rotating machinery. Acceleration is directly related to shock forces (impact) acting on a machine - thus the **VIBRASWITCH** offers a valid measurement of the destructive forces acting on the machine.

Acceleratory measurements made by the **VIBRASWITCH** are the summation of all the individual accelerations giving a total destructive force acting on the machine - the result is positive protection.

With the growing use of computers, an increasing number of applications are coming into existence where the Vibraswitch will be connected to a computer or PLC. In these applications the voltage and/or current may be too low for standard contacts. For these applications the model 366 may be supplied with an optional sealed switch with gold contacts.

Invensys®

Features & Benefits

- **Self Powered-**
Does not require external power to operate (Except remote reset.)
- **Optional Gold Contacts-**
For Low Voltage/Current Applications
- **Acceleration Sensitive-**
Measures destructive forces, not displacement.
- **No Maintenance-**
No moving parts except when set-point is exceeded.
- **Continuous Protection-**
No attention required after installation.
- **Ease of Installation-**
Requires no special training.
- **Long Life-**
Instrument is rugged and durable - no wearing parts.
- **Ease of Adjustment-**
Set it and forget it - one adjustment.
- **Reset-**
Remote electrical and manual at unit.
- **AC or DC-**
Reset coil options.
- **CSA Certified-**
Most models.

Principle of Operation

The Model 366 **VIBRASWITCH** employs a magnetic circuit opposed by inertial and adjustable spring forces in the actuating mechanism. Operation of the **VIBRASWITCH** may be understood by reference to Figure 1. The armature is constrained so as to respond to only one direction of movement by a frictionless flexure pivot composed of two overlapping blocks and a leaf spring loaded in one direction to hold the blocks together. The armature rotates on the pivot being forced in one direction by the adjusting spring force and the other direction by the magnetic force.

When the entire assembly is subjected to vibration perpendicular to the base, the peak acceleration times the effective mass of the armature produces an inertial force, aided by the adjustable spring tending to pull the armature away from the stop pin and the restraining force of the magnet. When the peak acceleration exceeds the set point level the armature leaves the stop pin, increasing the gap and decreasing the force with the armature continuing to move up until it reaches the latch magnet, actuating the switch during its upward travel.

The **VIBRASWITCH** may be reset by depressing the reset button or by applying power to the electrical reset coil. The effect of temperature in the mechanism is negligible as the elastic modulus of the adjusting spring and the magnetic flux through the air gap both decrease slightly with increasing temperature thereby compensating each other.

SWITCH CONFIGURATIONS

SPECIFICATIONS

Enclosure:General purpose, meets weather resistant NEMA 4 specifications

Enclosure Materials:

CoverHigh impact ABS thermoplastic
 BaseType 360 (Cu Free) Aluminum
 GasketKraton thermoplastic rubber
 GrommetNeoprene

Set Point Ranges:

Mounted Horizontal0 to 4.5 G (peak)
 Mounted Vertical0 to 3.5 G (peak)

Accuracy:± 5% of full range at frequencies up to 300 Hz.

Contact Ratings:

Designation "A":

SPDT
 7 A max. at 460 VAC max. noninductive;
 0.5 A max. at 120 VDC;
 1 A max. at 48VDC;
 2 A max. at 24 VDC;
 5 A max. at 12 VDC.

Designation "D":

DPDT
 5 A max. at 240 VAC max.;
 5 A max. at 30 VDC.

Designation "G":

DPDT - Sealed switch with gold contacts
 0.1 A max. at 125, 250 VAC res.;
 0.1 A max. at 30 VDC res.;
 5.0 mA min. at 6 VDC res.;
 2.0 mA min. at 12 VDC res.;
 1.0 mA min. at 24 VDC res.

Contact Arrangements: SPDT or DPDT

Temperature Limits: Maximum +200°F Minimum -40°F

Shock: 40 g @ 11 ms maximum

Manual reset:All models supplied with manual reset

Reset Coil: Available in 24 VDC, 48 VDC, 120 VDC, 120 VAC @ 50/60 Hz, and 240 VAC @ 50/60 Hz.

Reset Coil Power:24 VDC, 0.5 amp
 48 VDC, 0.2 amp
 120 VDC, 0.14 amp
 120 VAC, 0.3 amp
 240 VAC, 0.3 amp

Space Heater: 2 watt, same voltage as reset coil

Weight: Net 2 lbs.
 Shipping 2.5 lbs.

DIMENSION DATA

ORDERING INFORMATION

- * Standard Model 366 - A8
Optional Models - select from tables below.

Key Model Number

Designation	Description
*366	Vibraswitch®, Weatherproof NEMA type 4 & 12 Enclosure Range: 0 - 4.5G

Table 1 - Switch Contacts

Designation	Description
*A	SPDT - Single pole, double throw load contacts
D	DPDT - 2 gang mounted SPDT load switches.
**G	DPDT - 2 gang mounted SPDT sealed switches with gold contacts for low voltage/current applications

** Not CSA Certified

Table 2 - Remote Reset

Designation	Description
0	No reset coil
2	24 volt DC reset coil voltage
**3	240 volt AC reset coil voltage
4	48 volt DC reset coil voltage
7	120 volt DC reset coil voltage
*8	120 volt AC reset coil voltage

** Not CSA Certified

Table 3 - Special Options

Designation	Description
omit	No special options
E	Base painted with gray epoxy paint
***H	Space heater installed for maintaining internal area of unit moisture free. Space heater voltage same as reset coil voltage.
***EH	Base painted with gray epoxy paint and space heater installed for maintaining internal area of unit moisture free. Space heater voltage same as reset coil voltage.

*** Not available with 366-D3 or 366-G3.

Not CSA Certified when used with 366-D or 366-G.

ALSO AVAILABLE FROM ROBERTSHAW

Model 376A Vibraswitch

This Vibraswitch can be supplied with "Starting Time Delay" and/or "Monitoring Time Delay" for transient shock elimination to prevent false shut downs or alarm conditions.

See Product Specification 375A/376A for details.

Model 563A Vibraswitch Electronic Monitor

This monitor provides "Starting Time Delay" and "Monitoring Time Delay" for from one to eight Vibraswitches on a single machine. These delays are for transient shock elimination to prevent false shut downs or alarm conditions.

See Product Specification 563A for details.
